Name:		Machine model:	
Telephone:		Machine serial no:	
Email:		Quotation no:	
Company name & address:		Additional details:	
Signed:	Date:	Micron size(s):	

Why remesh?

If your mesh breaks, is low in tension or is damaged, remeshing is an economical alternative to replacing the entire mesh frame. Simply return your frame to us with this form and we will remesh it, saving you the cost of the ring.

Each damaged frame is carefully cleaned before rescreening to remove contaminants and maintain your product quality. For Russell Vibrasonic® Deblinding System screens, special finish or custom frames, remeshing is particularly cost-effective.

We remesh a complete range of frame sizes and offer different meshes to ensure you achieve optimum sieving accuracy.

Maintain your screening accuracy

Maximise your productivity

Reduce your costs
